

PurKlenz[®]
Topical Antiseptic Skin Cleanser
NDC 49436-291-01

Recommended Skin Cleansing Protocol for Laser Tattoo Removal

NOTE: Do not use PurKlenz inside the mouth, directly on the tongue, in the eyes, or around the eye lid & eye lash area. PurKlenz is safe to use on lips, eyebrows and genitals. Do not use PurKlenz if the presence of a disease or physical condition including, but not limited to, skin rash, infection or allergic reaction makes it impossible or undesirable to treat a particular client in the usual manner.

Ensure that products used in conjunction with PurKlenz, PurTect & PurSan do not contain PCMX (Chloroxylenol), for example Dettol, Green Soap or Provon.

1. Wash your hands and put on clean gloves.
2. Dispense PurKlenz onto a clean paper towel*.

NOTE: 1 full pump equals 4cc (0.135 ounce) of liquid.

3. Fold paper towel in half and gently rub both sides together to create a foam.
4. Unfold towel then clean skin by starting in the center and wiping outward with a consistent circular motion. Use gentle but firm friction.
5. Use the opposite side of the paper towel to repeat the same motion. This should not be an attempt to remove PurKlenz from the skin being cleaned.
6. Repeat steps 2 to 5.
7. Allow PurKlenz to sit on the skin for a minimum of 30 seconds.
8. Remove gloves and put on fresh gloves.
9. With a new clean paper towel, remove PurKlenz from the skin by starting in the center and wiping outward with a consistent circular motion using gentle but firm friction. If necessary, repeat to remove the PurKlenz.

NOTE: use a new paper towel and sterile water to make sure all the PurKlenz is removed from the area to undergo the Laser.

10. Client's skin has now been prepared. Follow appropriate Studio procedures for the Laser procedure.

* As may be required by your local Health Department, you can use sterile gauze instead of a clean paper towel.

Questions or Comments please contact PurKlenz Formulations or your Distributor.

Recommended Shaving Protocol for Laser Tattoo Removal

1. Wash your hands and put on clean gloves.
2. Dispense a sufficient amount of PurKlenz onto a clean paper towel*. The amount to be used is subject to the size of the area to be shaved.

NOTE: 1 full pump dispenses 4cc (0.135 ounces) of liquid.

3. Fold paper towel in half and then open it so as to evenly distribute PurKlenz across the gauze.
4. Clean the skin by starting in the center of the area to be shaved and end at least 2 inches beyond the area to receive the Laser. Wipe outward with a consistent circular motion using gentle but firm friction. There will be a thin visible layer of PurKlenz on the entire area to be shaved.
5. Take a single use disposable razor and begin shaving from the top of the area to the bottom in columns up to approximately 4-5 inches in length at a time. Make sure to shave with the direction of hair growth. Continue until the entire area has been shaved.
6. Dispose of razor in approved sharps container after use. Do not recap.
7. Wash area with sterile water and a clean paper towel to wipe off all excess PurKlenz left on skin after shaving.

* As may be required by your local Health Department, you can use sterile gauze instead of a clean paper towel.
